

DRIFTING

Explore the hidden history of the Thames path with the people who live and work on the river

Take a two hour self-guided audio walk along the picturesque riverside path at Hampton Court, or discover the rarely visited industrial wharfs of the Greenwich peninsular. As you explore, you will hear stories from river dwellers connected only by the current of the Thames.

CDs and maps are available from the geography department office, or download the walk for your mp3 player from the memoryscape website.

After experiencing a Memoryscape, you will never see the River Thames in the same way again.
